

# Left Center Right

Each player starts with three tokens. Players take turns rolling the dice, continuing clockwise.

To start: Roll all three dice. Each die tells you what to do with a token.

For each L (left): pass a token to the left

For each C (center): put a token in the center

For each R (right): pass a token to the right

For each Heart: keep a token

As the game continues, you roll the same number of dice that you have in tokens. For instance, if you have only two tokens, roll only two dice.

Players with no tokens pass on their turn. But they could get tokens passed to them in the next round.

The last player with tokens wins the game.

**Variation of the game:** Play with quarters (or \$1 bills!!!) instead of tokens and the winner gets the pot!
